Subject: RE: MIT Testing December 19th

Hi Mr. Litt,

We completed a series of three successful pressure tests on the first injection well today. It appears that we have the equipment challenges sorted out, and hopefully we move along smoothly from here. (knock on wood)

Tomorrow we will move to the second well, get the injection equipment pulled out, conduct the video log, differential temperature logs, and then set up the next pressure test.

The testing is overseen and documented by Hailey and Aldrich and recorded by an In-Situ pressure transducer with a built in datalogger.

We will continue to plan for a demonstration of the testing for you and Mr. Reeder on the 19th.

Thanks,

Ian

Subject: MIT Testing December 19th

Hi Mr. Ream:

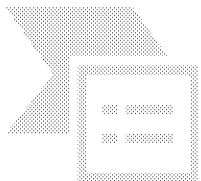

My name is Joshua Litt and I am a groundwater inspector with the Arizona Department of Environmental Quality (ADEQ). Nancy Rumrill mentioned to me that Florence Copper is conducting MIT tests on its' wells. We (myself and Dan Reeder) would like to come out on Thursday, December 19th to observe the pressure-testing that is occurring, if possible. Would that work for you? Please let me know.

Thanks,

Joshua Litt
